

Turnkey Wastewater Treatment Plant for Fortune 500 Company

Our strength in 3 dimensional designs allowed us to conceptualize the entire plant prior to the actual manufacturing. This enabled us to work with the customer and the engineering company to overcome issues related to layout early on. Our proven project management, plant design and engineering skills allowed SAMCO to provide a plant that all involved parties are proud to be a part of...

SAMCO onsite project management ensures that all aspects of this project are proceeding on schedule and without cost escalation...

This project involved Civil, Electrical and Mechanical components and the construction of the entire plant housed in a building.

Because SAMCO focuses solely on water treatment equipment and systems, we bring the value of our manufacturing of these components to the project. By using our systems our customers gain the following:

- ◆ Single point accountability of process performance.
- ◆ Working with experts who have experience running multiple treatment plants.
- ◆ Superior problem solving and operational expertise.
